▀ One font, 249 icons

In a single collection, Font Awesome is a pictographic language of web-related actions.

-pencil CSS control

Easily style icon color, size, shadow, and anything that's possible with CSS.

✖ Infinite scalability

Scalable vector graphics means every icon looks awesome at any size.

🍺 Free, as in Beer

Font Awesome is completely free for commercial use. Check out the [license](#).

✓ IE7 Support

Font Awesome supports IE7. If you need it, you have my condolences.

👁 Perfect on Retina Displays

Font Awesome icons are vectors, which mean they're gorgeous on high-resolution displays.

mura

The dynamic stylesheet language.

LESS extends CSS with dynamic behavior such as variables, mixins, operations and functions.

LESS runs on both the server-side (with [Node.js](#) and [Rhino](#)) or client-side (modern browsers only).

Variables

Variables allow you to specify widely used values in a single place, and then re-use them throughout the style sheet, making global changes as easy as changing one line of code.

```
// LESS
@color: #4D926F;
#header {
  color: @color;
```

```
/* Compiled CSS */
#header {
  color: #4D926F;
}
h2 {
```

Write some LESS:

```
@base: #f938ab;

.box-shadow(@style, @c) when (iscolor(@c)) {
  box-shadow:      @style @c;
  -webkit-box-shadow: @style @c;
  -moz-box-shadow:   @style @c;
}
.box-shadow(@style, @alpha: 50%) when (isnumber(@alpha)) {
  .box-shadow(@style, rgba(0, 0, 0, @alpha));
}
.box {
  color: saturate(@base, 5%);
  border-color: lighten(@base, 30%);
  div { .box-shadow(0 0 5px, 30%) }
```

Compile to CSS:

```
npm install -g less
lessc styles.less styles.css
```

CfStatic

CSS and JavaScript control for CFML applications

[home](#) [quick start](#) [full guide](#) [downloads](#) [contributing](#) [ebook](#)

Welcome to CfStatic

CfStatic is a framework for the inclusion and packaging of CSS and JavaScript files for CFML applications.

CfStatic takes care of:

- Minifying your CSS and JavaScript
- Compiling your CoffeeScript and LESS CSS
- Including your CSS and JavaScript in the correct order, with all dependencies satisfied
- Adding sensible cachebusters to CSS image paths and CSS and JavaScript includes

Key features:

- Minifies your files for you using YuiCompressor
- Compiles your LESS CSS for you
- Compiles your CoffeeScript for you
- Dependency configuration through self documentation
- Easy, zero-code, switching between inclusion of raw source files and minified files
- Small API, only 4 public methods (including the constructor)
- Built for production; no need for CSS and JavaScript file packaging in your build scripts, code can be put in production
- Minified files are saved to disk, CF is not involved in serving the files

Demo:
UI

Simplify the User Interface

- **Class Extension Manager**
 - **SubTypes**
(Custom Content Types)
 - **Attribute Sets**
(Think “Fieldsets”)
 - **Custom Attributes**
(Think “Form Elements”)

Demo:

Custom UI

MuraCon US
Kansas City, MO
September 30th-October 1st, 2013

MuraCon will feature sessions by top developers from the Mura CMS world, showing off the developments and features in Mura CMS. Connect with the Mura CMS community and learn how you can harness the power of one of the world's top Content Management Systems.

Why Attend?

Knowledge
MuraCon is the only user conference focused solely on Mura CMS. You'll get 2 days of presentations by both Mura Team members and the best the Mura Community has to offer.

Community
Yep. Community. The heart of every open source project. From newbies to power users, MuraCon gives you the opportunity to share and learn from all of them.

MuraCon Europe
Edinburgh, Scotland
June 5th, 2013

MuraCon EU will feature sessions by top developers from the Mura CMS world, showing off the latest developments and features in Mura CMS. Held the day before Scotch on Rocks in Edinburgh, Scotland, MuraCon EU will show how you can harness the power of one of the world's top Content Management Systems.
